consequences of technological choices, and how technologies can be helpful or hurtful. Typically focuses on one or a related group of technologies.

PHIL 2340 Bioethics (3)

This course explores the ethical issues that arise with changes in medical technologies and health care policies. Students explore the philosophical concepts of autonomy, duty, justice, and care as they apply to patients and physicians. Topics covered may include stem cell research and cloning technologies, organ transplantation, experimentation on animals, prenatal diagnosis and abortion, euthanasia and assisted suicide, access to experimental treatments, and allocation of scarce resources.
